CAREER OBJECTIVE

Motivated Computer Science Engineering student with a strong foundation in Python, SQL, web technologies, and problem-solving. Seeking an entry-level software engineering opportunity to apply technical knowledge, contribute to real-world projects, and continuously develop skills in software development, artificial intelligence, and machine learning.

EDUCATION

St. Ann's College of Engineering and Technology

B.Tech – Computer Science and Engineering | CGPA: 8.55 | 2023 – 2027

D.N.M Junior College, Inkollu

Intermediate – MPC | 97% | 2021 – 2023

Niveditha English Medium School, Inkollu

10th / SSC | 99% | 2021

TECHNICAL SKILLS

Programming: Python

Web Technologies: HTML, CSS

Database: MySQL, SQL

Tools: GitHub, Visual Studio Code, Jupyter Notebook

Operating System: Windows

Core Concepts: Problem Solving, Object-Oriented Programming Basics, Database Management, Web Development, Machine Learning Basics, Data Analysis Basics

PROJECTS

AI-Based Crop Recommendation System for Farmers

- Developed an AI-based crop recommendation system that suggests suitable crops based on soil and environmental parameters.
- Implemented machine learning techniques using Python to analyze N, P, K, temperature, humidity, pH, and rainfall data.
- Applied classification, data preprocessing, and machine learning concepts to provide data-driven crop recommendations.
- Designed the system to assist farmers in making informed crop selection decisions.

Recipe Management System

- Developed a web-based Recipe Management System to organize and manage recipe information efficiently.
- Created a user-friendly interface using HTML and CSS.
- Used MySQL for storing and managing recipe-related data.
- Applied web development, database management, and CRUD operations concepts.

CERTIFICATIONS

- Basic Python – HackerRank
- Introduction to Artificial Intelligence – Infosys Springboard
